## EDUCATION

| Degree | Institute | CGPA | Year |
|---|---|---|---|
| B.Tech. (Computer Science) | Delhi Technological University | 8.03 | 2022–2026 |

## EXPERIENCE

**SDE Intern, Blue Star Publications (Delhi, India)** **Nov 2025 – Dec 2025**

- Improved legacy codebase by debugging critical issues and adding new features, enhancing system reliability and user engagement.
- Collaborated with a 5-member development team across multiple sprints to design scalable database schemas and apply optimal design patterns.
- Built a secure admin dashboard with **5+ CRUD operations**, **JWT authentication**, and **role-based access control (RBAC)**.
- Developed scalable backend APIs using **MERN stack**, ensuring idempotency and efficient handling of concurrent requests.

**Frontend Developer Intern, AbroadKart** **Jun 2025 – July 2025**

- **Student Pre-Counselling Portal** – Built a multi-step onboarding system using **React.js** to collect and structure student academic data efficiently.
- Developed responsive UI components with robust form validation, ensuring clean and reliable backend data flow.
- **University Data Scraper** – Created an automated scraping tool using **Python** and **Selenium** to extract and organize university program data.

## PROJECTS

**QuickBlog - AI** | *Live Demo* | *Source Code*

- **Built a full-stack blog platform** using **Gemini AI** for real-time **content generation** and secure **JWT-based admin authentication** with dashboard controls.
- **Integrated ImageKit** for optimized **image uploads** and **CDN storage** with **MongoDB**, enabling **comment approval** and **blog filters**.
- **Developed a responsive UI** with **Tailwind CSS** and **animated components** for a smooth user experience.
- **Enhanced performance:** improved **FCP** from **2.5s** to **0.7s** and **LCP** from **3.1s** to **1.2s** via **lazy loading** and **asset minification**.

**VibeChat** | *Live Demo* | *Source Code*

- **Developed a full-stack app** supporting **real-time chat** and **video calls** via **Stream.io**.
- **Secured** with **JWT auth**, **encrypted passwords**, and optimized **MongoDB queries** for fast data handling.
- **Improved frontend performance** using **TanStack Query** for caching and **Zustand** for global state.
- **Optimized load times:** reduced **FCP** from **1.7s** to **0.9s** and **LCP** from **2.6s** to **1.5s** through **lazy loading** and **code optimization**.

## TECHNICAL SKILLS

**Programming Languages**: C++, C, JavaScript, Python
**Web Technologies**: HTML, Tailwind CSS, ReactJS, NodeJS, ExpressJS
**Database Management**: MongoDB, PostgreSQL
**Version Control**: Git, GitHub
**Tools & Platforms**: Visual Studio Code, Cursor, Postman, Chrome DevTools
**Coursework**: Data Structures, Operating System, Database Management, Object Oriented Programming, Computer Network, Software Engineering

## ACHIEVEMENTS

**Competitive Programming and Problem Solving** | *LeetCode* .

- **Overall:** Solved over **1000+ DSA problems**, demonstrating strong skills in **algorithms and data structures**.
- **LeetCode:** Solved over **800+ problems**, reached a **peak rating of 1563**, and earned **11 badges**.

**Student Coordinator, PARTH Society**

- Conducted 50+ mental health & spirituality sessions and organized 5 educational trips, managing logistics for 100+ participants while enhancing student engagement.
